Summary

Senior technical writer with 7+ years of experience creating documentation for enterprise SaaS products, with strengths in UX writing and content strategy. I learn complex systems quickly and turn that understanding into clear documentation and in-product guidance that help users succeed. I also build the systems behind the content, including editorial standards, AI-assisted workflows, and cross-functional processes that keep documentation accurate, consistent, and scalable as products grow.

Experience

ClickUp | Senior Technical Writer | Remote | Aug 2024–Jun 2026

- Led content strategy and editorial standards, defined style guidelines, and ensured consistency across the ClickUp Help Center.
- Partnered with product, design, engineering, and support to translate role-based access rules into concise UX labels and descriptions.
- Aligned engineering, design, and marketing on product terminology to improve consistency across the UI, Help Center, and marketing content.
- Built and operationalized AI-assisted workflows that monitored the product backlog and existing documentation, identified content gaps, generated documentation drafts, and automated research and scoping work that had previously required approximately three hours per writer per day.
- Designed and launched a customer feedback survey to identify content gaps and prioritize improvements to underperforming Help Center content.

ClickUp | Technical Writer | Remote | Sep 2021–Aug 2024

- Played a key role in building and scaling the ClickUp Help Center, establishing editorial processes, review workflows, and documentation standards to support rapid growth.
- Introduced SME review workflows that brought engineering and product voices into the editorial process, ensuring technical accuracy across help content.
- Helped build and scale a Help Center that grew 15% from 2022 to 2023, reaching approximately 4.2 million annual sessions.
- Created documentation for complex SaaS workflows, including AI features, identity and access management, and billing functionality.

Megasys | Technical Writer | Orange, CA / Remote | Feb 2019–Sep 2021

- Built and managed customer-facing and internal help centers as the sole technical writer and editorial owner.
- Collaborated directly with engineers to produce API documentation using Postman, translating highly technical material into clear, usable reference content.
- Produced product content across multiple formats, including UI tooltips in JSON and database change documentation in Markdown.
- Served concurrently as Scrum Master for an eight-person development team, facilitating Agile ceremonies and sprint planning.

Freelance Writer & Editor | Hybrid: New York, NY & Remote | Jan 2013–Dec 2018

- Wrote and edited for arts and culture organizations and publications, including Abrams Books, The New York Public Library, Rizzoli Publications, *Artforum*, *Frieze*, *Time Out New York*, and *Flash Art*.
- Produced compelling content for diverse audiences across print and digital formats.
- Managed overlapping editorial projects for several clients, collaborating closely with writers, publishers, and designers.
